What's New in Norfolk AIR 2.1?

- **Customized Reporting**: Users will have the option of printing selected sections of the data that appears under the INFO tab. After users select from 12 different choices the report will open in a new window which allows for viewing, printing, or exporting to other formats such as PDF, Word, etc.

- **Faster Response**: When users click on an adjoining property displayed on the map, and use the "View Data" link, the application will no longer redraw the entire map. The data under the INFO tab will also be automatically updated.

- **Tablet Support**: The slider to change from the base map to aerial photography has been moved to the left side of the screen. This will allow users of smaller screens such as a tablets to use this feature.

- **Enhanced Labels**: Street names, address, and other parcel labels will now display when the aerial photography is displayed.

- **Zoning Data**: Enhanced the layout and correct problems for properties with multiple zones.

- **SCC Properties**: Properties that are taxed by the State Corporation Commission will no longer display an error message. The user will be notified of this status and that there is no Real Estate
